

# Sub Safe U1

The mobile bomb shelter is UV, acid, soil and weather proof and will endure extreme temperatures

The raw material producer and the pipe manufacturer guarantee the polyethylene shelter will endure temperatures between -50 and +80 °C. Customers can choose the shelter's length, width and shape. There are also various accessories available, for example, toilet, sink, medical cupboards and various ventilation filters.

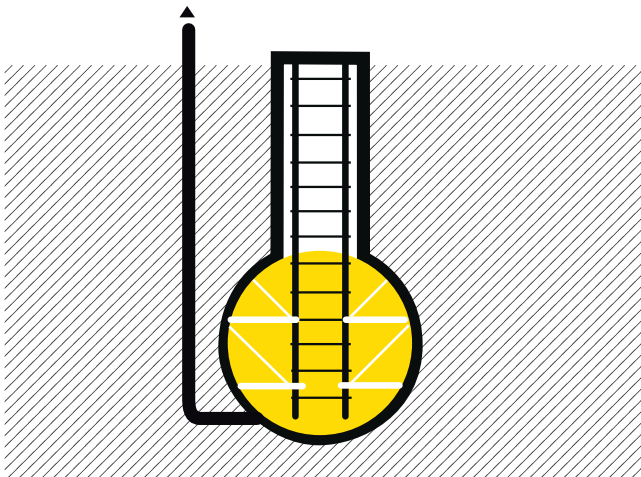

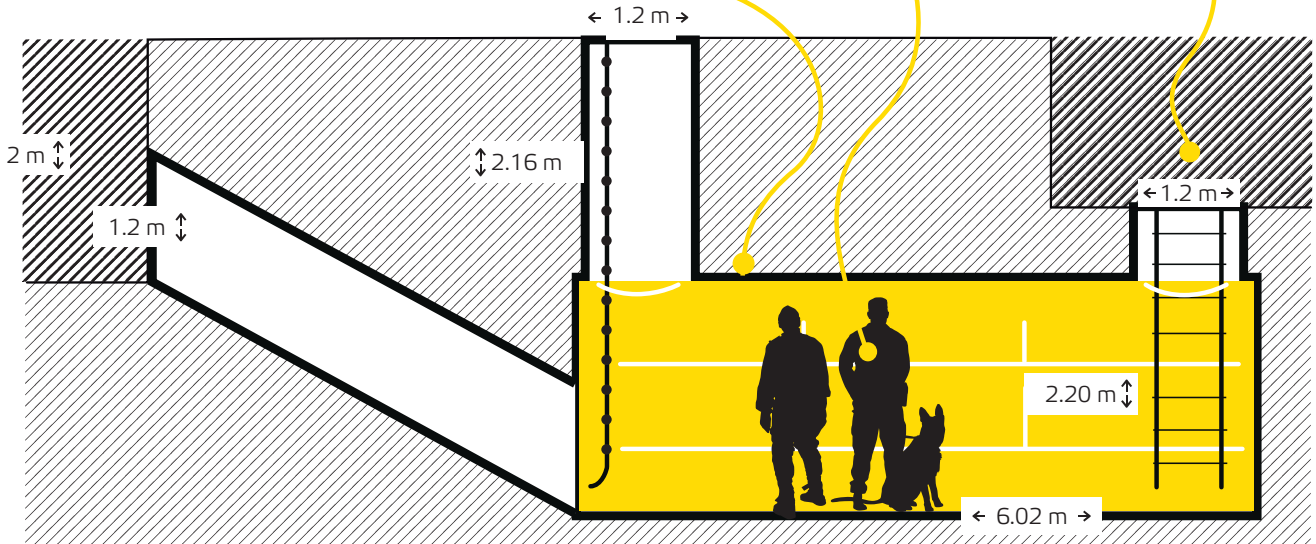

# Sub Safe U1

To gain extra space, the ladder will be placed onto the ceiling of the shelter.

One bomb shelter has room for up to twelve persons.

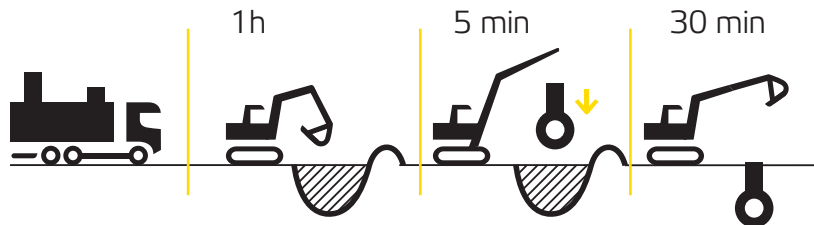

It is possible to install radiation filters, air conditioners, heating system, power generators etc.

-50 to +80°C

150 mm shell resistant

The bomb shelter can be easily relocated.
